

Marriage License in Toronto Before and After Pandemic*

An analysis of marriage licenses in Toronto from 2011 to 2024

Emily Su

September 20, 2024

This paper looks at the number of marriage licenses created across Toronto from 2011 to 2024. We discovered that there was a steep increase in the number of marriage licenses after 2020. Further investigation is needed on the reasoning behind this.

1 Introduction

You can and should cross-reference sections and sub-sections. We use R Core Team (2023), Gelfand (2022) and Wickham et al. (2019).

The remainder of this paper is structured as follows. Section 2....

2 Data

Figure 1 showcases a Poisson distribution of marriage licenses in Toronto with a lambda of 10 from 2011 to 2024. As we can see that the distribution of marriages stays the same from 2011 to 2020. However, after 2020, there was a significant jump in the number of marriage licenses in Toronto. This indicates that there are more marriage licenses being created per year after the pandemic than prior.
